

RETAIL FIXED ASSET COUNT ACROSS MULTIPLE COUNTRIES

Case Study: Fixed Asset Services – Cencosud

Cencosud needed a solution to **count the assets within the retail stores** across multiple countries, and **identify variances**

RETAIL FIXED ASSET COUNT ACROSS MULTIPLE COUNTRIES

Case Study: Fixed Asset Services – Cencosud

Cencosud S.A. is a publicly traded multinational retail company. The largest retail company in Chile, the third largest listed retail company in Latin America, and one of the largest retail companies in the region. The company has more than 1045 stores in Latin America, a multi-format retail with a presence in five countries and with more than 140 thousand employees.

REQUIREMENT

Cencosud needed a solution to count the assets within the retail stores and identify variances, so required RGIS to provide the following:

- Coverage across **multiple countries**
- The capacity to be able to **complete 250 stores**
- Completion within a **time frame of two months** in the last quarter of the year
- **Identify variances** to existing asset register

SOLUTION

Cencosud partnered with RGIS to complete the **retail asset count project**, and provided the following:

- Scheduled a team of **three experienced RGIS auditors** per store
- Asset counts **completed daily at multiple stores**
- All assets in each store were **counted and reported on**
- Variances were reported in comparison to the existing asset register of expected **quantities and locations**

RESULTS

Cencosud found by outsourcing the **retail asset count project** to RGIS, the following results were achieved:

- **All store assets were counted** within the requested two month time frame
- A total of **55,096 assets were counted** across 250 stores
- The customer was now **aware of all assets**, and is able to transfer items if required to other locations, rather than over ordering assets

cencosud

By partnering with RGIS, Cencosud found that **55,096 assets were accurately counted** and could be transferred if required, to other locations rather than over ordering assets
